1.
The first part of the paper is devoted to a discussion of the
theoretical aspects of the problem. It is shown that the
problem is equivalent to the problem of finding the
minimum of a certain functional. This functional is
defined as the sum of the squares of the differences
between the observed and the calculated values of the
function. The functional is then minimized by the
method of steepest descent. The results of the
calculation are shown in the following table.

The second part of the paper is devoted to a discussion of the
practical aspects of the problem. It is shown that the
problem can be solved by the method of steepest descent.
The results of the calculation are shown in the following
table.
